

Thermoelectric Coolers

Active cooling in handbag-size format

MOBICOOL

Our Name is our Mission

T07 DC

Champion personal cooler for private and professional use. This compact appliance fits into any car – and is easy to carry for those wishing to transport food to work or daily travels.

Small though it seems, its approx. 7-litre cooling capacity is impressive - large enough for quite a number of cans. Or 0.5 - litre bottles, with sufficient space to put them upright. The T07 cools up to 20°C below the ambient air temperature and even provides heating if required.

Snacks and drinks remain cool and fresh for many hours!

Cosmetics and medicals, too, like it cool.

Cable compartment integrated in the lid. Invisible magnetic lock securely closes lid.

Descriptive label and protection shrink-wrap for point of sale presentation

Space for eleven 0.33-litre cans, or nine 0.353-litre ones

Shoulder strap for convenient transport

Power from 12-volt car battery

Wine Chambers

Wines need a quiet place to unfold their potential. Therefore, the vibration-free wine chamber provides ideal storage conditions.

Storing wines at drinking temperature

D60 WINE CHAMBER

Perfect temperature for six bottles of wine

Digital monitor displays the preset and current temperature in °C.

Easy to use with keys for all essential functions.

Ready for connection to the domestic mains (100 – 240 volts AC)

Always ready to serve: the wine chamber stores wines at the perfect temperature – and keeps you well prepared for a planned dinner party or a spontaneous guest.

The desired temperature (between 5°C and 20°C) is simply preset and then reliably maintained.

The thermoelectric appliance is powered from the mains (100 – 240 volts AC) and is accented by an interior light.

Wine Climatiseurs

Table wines served at the ideal temperature

An improperly chilled wine can be a great disappointment to the palate.

The wine climatiseurs maintain table wines at the correct temperature for many hours.

The temperature is continuously variable and shown on the digital display.

Unique to the market: the stylish appliances are suitable for **cordless** operation.

The D10 standard version uses common AA alkaline batteries, the D10-LX luxury model is supplied complete with a rechargeable NiMH battery pack.

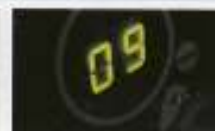

D10 WINE CLIMATISERS

Cordless operation possible with eight type AA batteries

Mains adapter for operation with 100 – 240 volts AC

Soft-touch keypad with digital monitor displays the preset and current temperature in °C.

Cordless Wine Climatizer for the festive table!
